DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1, 9 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sask (US 6,527,050).

Sask discloses a method of removing formation damage through the controlled injection of fluids into a formation (i.e., "creating a transient overbalance pressure"), followed by a controlled sudden release of pressure in the formation (i.e., "creating a transient underbalance pressure") to cause fluid and damaging materials to flow back into the wellbore. Sask also suggests that the method is most effective when repeated more than once (See the Abstract).

It is noted that when the method is repeated more than one, a transient overbalance pressure condition of the second cycle is created after a transient underbalance pressure condition of the previous cycle.

Allowable Subject Matter

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 6-8, 10, 33 and 34 are allowed.

Art Unit: 3672

Response to Arguments

5. Applicant's arguments with respect to claims 1, 9 and 10 have been considered but are moot in view of the new ground(s) of rejection.
